

# Nakamichi®

## 5 & 10-Disc Listening Station

### DEPENDABLE

Nakamichi is world-renowned for its high-end sound quality, state-of-the-art design and product dependability in the music industry.

### COMPACT AND VERSATILE

The compact, versatile design of the MB-K1000 series is highly customizable and space-efficient. The separate control panel and CD changer allows for infinite installation capabilities, be it existing fixtures or custom built displays.

### QUICK TRACK SELECTION

The ultra-reliable high-speed changer mechanism is based on Nakamichi's patented MusicBank™ technology, providing fast changes without annoying delays.

# OPTIONAL MERCHANDISERS

MB-K1000f-CT

## MB-K1000 SERIES, COUNTER-TOP STAND

Ideal for CD bars, interactive lounge areas, counter-tops or any narrow display area. Install the CD changer behind your counter for easy access and change CD selections with total ease while still maintaining control of your inventory.

- Built in Headphone Hanger
- Dimensions: 14.5" H X 7" W X 3" D
- High Quality Construction  
Colour: Semi-Gloss Textured Levis Silver  
(custom colours available upon request)

## 5-DISC WALL MERCHANDISER

This totally self-contained wall merchandiser houses the entire MB-K1000f 5-Disc System in less than 2 sq. ft. of wall space. The Nakamichi 5-Disc Changer is easily accessible and is securely locked within the wall merchandiser. This makes the entire listening station a plug and play system.

- Wall or Slat Wall Mountable  
(brackets included)
- Strategically angled shelves promote full eye contact of CD facing at a glance
- Merchandiser shelf holds 35 CD's  
(7 per shelf)
- High Quality Construction  
Colour: Semi-Gloss Textured Levis Silver  
(custom colours available upon request)
- Dimensions:  
14.5" H X 20.5" W X 10" D

- Self-contained fixture with lockable storage

**Nakamichi**  
10 Disc Listening Station

**THE MB-K1000 SERIES  
LISTENING TOWER**

The compact and fully mobile Listening Tower can feature 5, 10, 15 or 20 CD's in less than 2 sq. ft. of floor space. It is a self-contained plug and play system because the Nakamichi CD changers are stored in the lockable base.

- Strategically angled shelves promote full eye contact of CD facing at a glance
- Compact, highly effective display, compatible with any décor
- Each Listening Tower has 10 shelves per side for a total capacity of 140 CD's per Tower. (7 per shelf)
- Removable sign holder allows for custom signage
- Up-gradable - start with a 5 Disc Listening Tower and easily up-grade to either a 10 , 15 or 20 Disc Listening Tower by purchasing only the modules you require.
- Colour: stand/base - Semi-Gloss Gunmetal Finish (custom colours available upon request)
- Dimensions: 65.5" H X 20" W X 19.25" D
- Weight: Approximately 75lb

The Nakamichi 5-Disc (MB-K1000f) and 10-Disc (MB-K1000) series of listening stations are the smallest and most versatile in the music industry.

The MB-K1000's puts your top-selling music at your customers' fingertips via a control panel that is the size of a CD jewel case.

Features	Benefits
Nakamichi is the only company that manufactures listening stations specifically for the commercial market and does not use consumer-modified components.	You are dealing with only one manufacturer who services their product in its entirety with service centres in most major cities throughout the world.
Changer mechanism does not contact the recorded surface of the CD.	Repeated disc changes will not damage the disc.
Programmable First Track - allows you to program any title song on each CD as the default track.	Create instant artist recognition with your customers and increase the impulse to buy. Hit songs are what sell CDs.
Informative Play Counter - provides a digital readout of how many times a specific CD has been accessed.	Assists your staff with inventory management, allowing them to be better informed about product selection and marketing.
Auto Standby Function - station switches to standby mode when there is no key input for about five minutes.	Protects the laser pickup from unnecessary wear.
The 5-Disc version of the MB-K1000 system can be easily up-graded to a 10-Disc.	Low cost up-grade as the same operating panel is used. There is no need for costly retrofits.
Optional extension cables enable you to install the CD changers at a substantial distance from their controller.	Placing the CD changers in a central location simplifies disc management

## dbi Pro705 Headphones

**Specially Designed** - delivering uncompromising sound quality while maintaining a rugged construction to handle the constant wear and tear from hundreds of users daily.

**Extremely Durable** - featuring a steel armoured cable (rubber-coated), a reinforced covered steel headband and replaceable ear-pads.

**Quality Components** - copper plated aluminum voice coil and a very light diaphragm produce an incredibly low tight bass together with warm high frequencies.
